

**Problems:**

(Issues identified from different participants)

- event preview seems like an unnecessary extra step
- couldn't find own events / thought global list was personal history of events
- Chicago Cares heart is not intuitive as favourite
- "Discover" in menu is not intuitive, maybe "Find an event"? or maybe change "Learn" to "Issue Areas" or both
- segmented control icons not clear, maybe use words
- email event leader icon is unclear
- category icons not intuitive to tap on
- need search field to search by words
- need to add duration/time to event detail
- link to issue area from event detail

**Interesting Notes:**

- want to be able to open event map in Google Maps
- confirmation screen after signing up and removing self, show future occurrences?
- market place? events hub? for list of events?
- add organizations to category detail
- search by evenings?
- setting reminders
- tutorial?
